Benefits of WPC / PVC Wall Panels

Panel size: 6" × 114"

Panel area: 4.75 sq/ft each

Material: PVC / WPC composite

Applications: accent walls, ceilings, bars, TV backdrops, and interiors

Stylish • Durable • Maintenance-Free

1. Elegant Modern Look

Instantly transforms any wall or ceiling with a sleek, contemporary finish — available in multiple colors and wood textures.

2. Waterproof & Moisture Resistant

100% waterproof, making it perfect for bathrooms, kitchens, and outdoor covered areas without risk of swelling or mold.

3. Easy Installation

Lightweight panels with interlocking tongue-and-groove design allow fast, clean installation — no grout or heavy tools required.

6. Sound & Thermal Insulation

The hollow core structure improves room acoustics and helps maintain indoor temperature.

7. Fire Retardant

Manufactured with fire-resistant materials for added safety in homes and commercial spaces.

8. Durable & Long-Lasting

Scratch-resistant and fade-proof surface designed to maintain its look for years under daily use.

9. Eco-Friendly Material

Made from recyclable composites — sustainable, non-toxic, and safe for indoor air quality.

10. Versatile Applications

Suitable for living rooms, bedrooms, offices, lobbies, ceilings, feature walls, and more.

Polar White

Crisp and clean pure white with a smooth surface, great for modern and Scandinavian-style decors.

Amber Chestnut

A rich reddish-brown tone that adds warmth, depth, and luxury to any wall. A perfect blend of modern and classic design.

Urban Taupe

A warm, modern brown-gray with a subtle texture — perfect for neutral, minimalist interiors.

Golden Timber

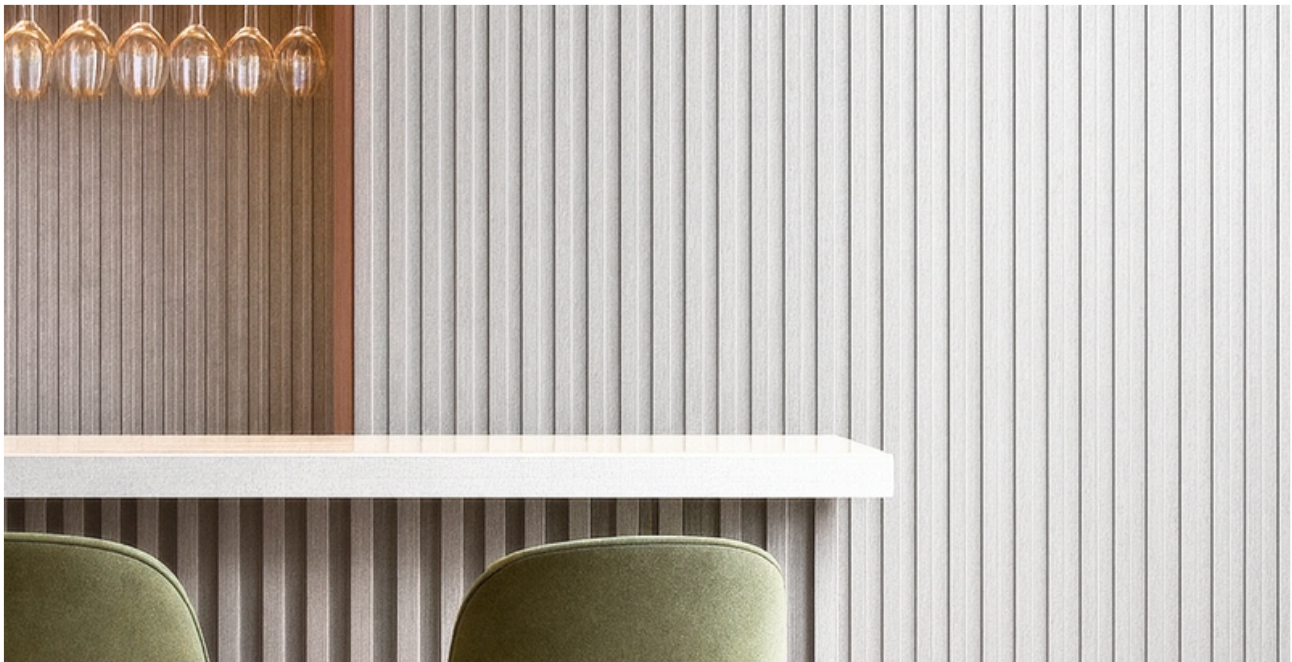

A natural golden-brown tone with visible knots and woodgrain texture — ideal for warm, rustic, and modern interiors alike.

Steel Silver

Industrial-inspired light steel gray with texture and depth, balancing cool tones beautifully — ideal for contemporary and modern interiors.

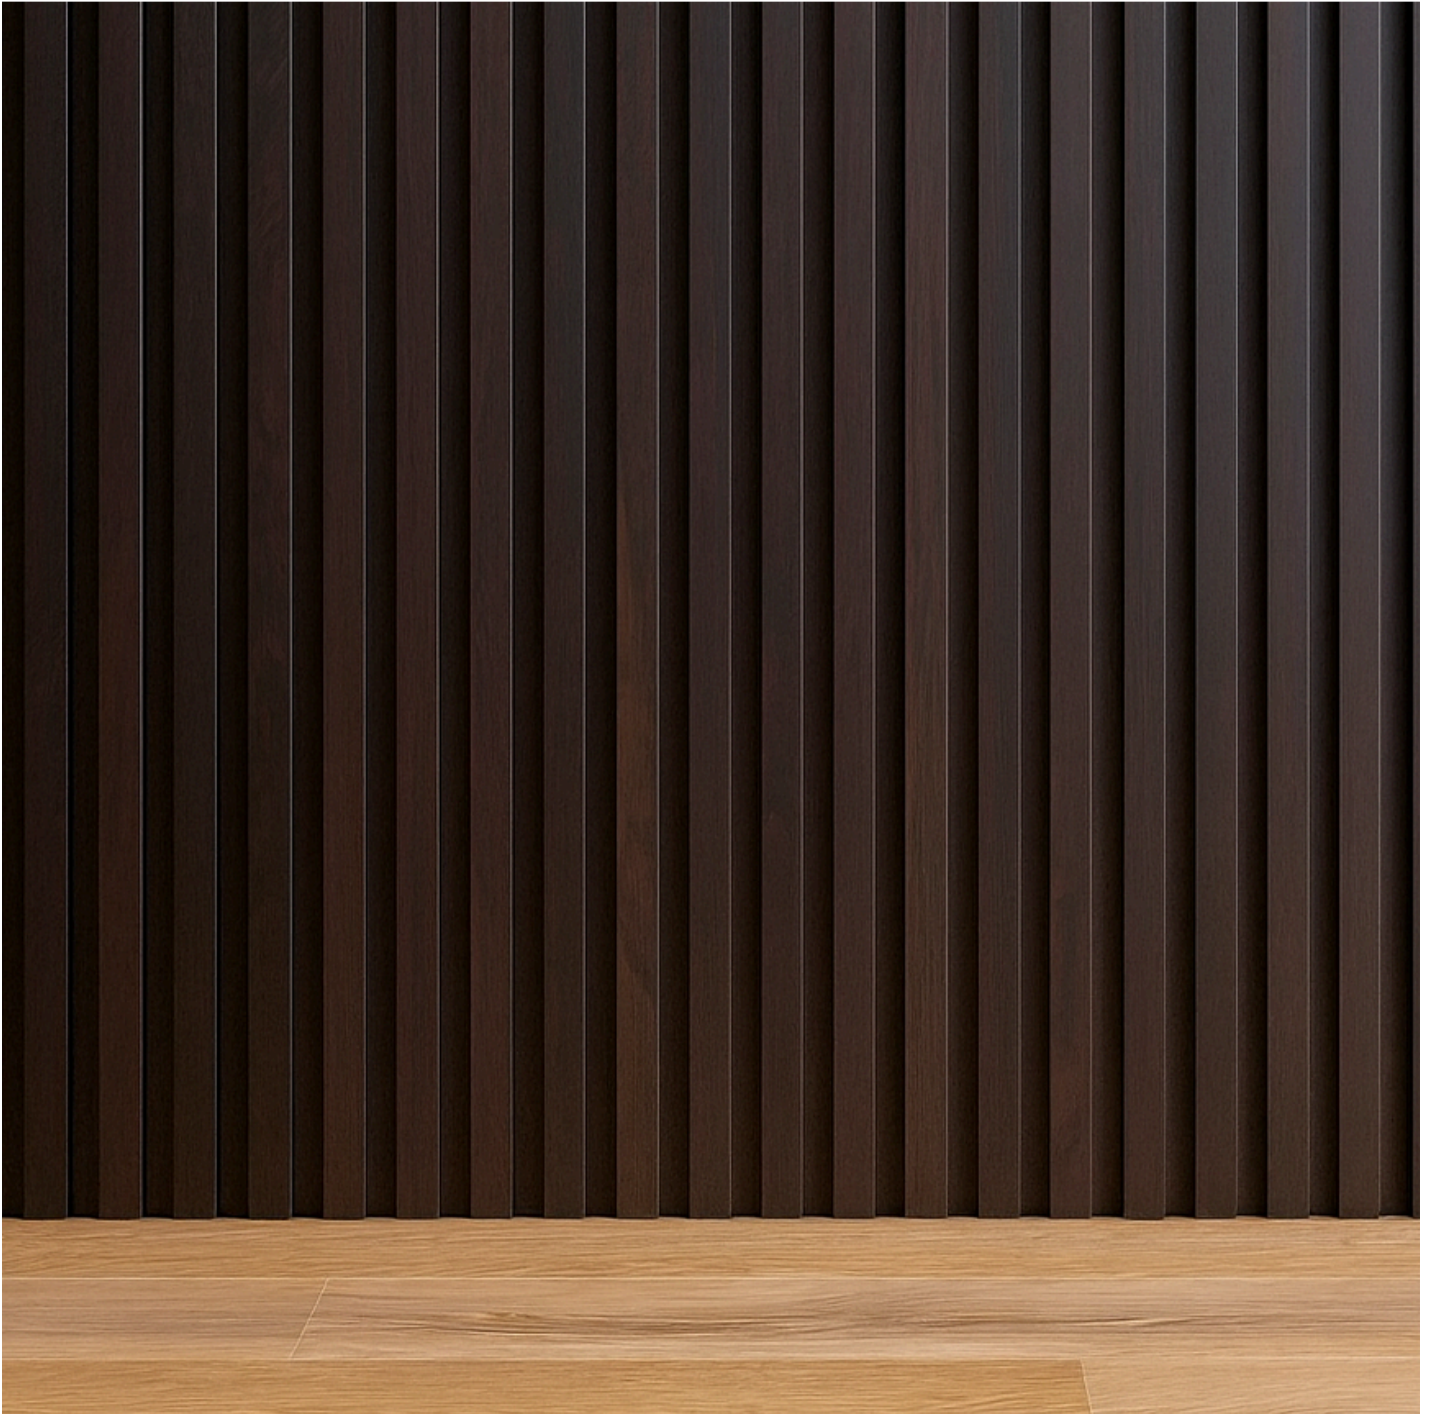

Arctic Mist

A light gray tone with fine lines that give a sophisticated, fresh look — ideal for bright spaces.

Midnight Ebony

**Deep, elegant black-brown with a soft matte finish -
a true statement color for high-end designs.**

PVC MARBLE PANEL COLLECTION

Premium Floors & Designs PVC Marble Panels combine elegant Italian-inspired stone visuals with modern lightweight technology. Ideal for walls, backsplashes, bathrooms, ceilings, and commercial interiors, these panels deliver luxury style with easy installation and long-lasting durability.

Key Features

 - **Thickness:** 3mm rigid composite
 - **Material:** Modified PVC composite – water, moisture, and impact resistant
 - **Finish:** High-gloss UV surface, scratch-resistant, and easy to clean
 - **Installation:** Glue or screw-on — no grout required
 - **Applications:** Interior walls, TV backgrounds, kitchen islands, reception areas, ceilings, and more
-

Calacatta Storm Gold

Luxurious white marble base with soft gray veins and warm golden undertones, giving it a high-end, elegant aesthetic that stands out in any modern interior.

Calacatta Glacier

A timeless white marble design with soft gray veining, inspired by classic Italian marble. It gives any wall or surface a clean, luxurious, and modern look perfect for minimalist or high-end interiors.

Arctic Gray Vein

A sophisticated medium-gray marble tone with white crystalline veins that create depth and a luxurious stone appearance. Perfect for modern interiors, accent walls, or commercial spaces, it brings a sleek and contemporary feel while maintaining a natural marble look.

Calacatta Royale

A luxurious white marble with golden and gray veining, reminiscent of premium Italian marble. The blend of warm gold streaks and soft silver veins gives it an elegant and timeless look, perfect for feature walls, living rooms, or upscale commercial interiors.

Calacatta Storm Gold

A stunning white marble design with dramatic golden and gray veining. The contrast between the warm gold accents and cool smoky lines creates a bold, luxurious statement, ideal for feature walls, lobbies, or modern kitchens looking to add elegance and sophistication.

Calacatta Glacier Blue

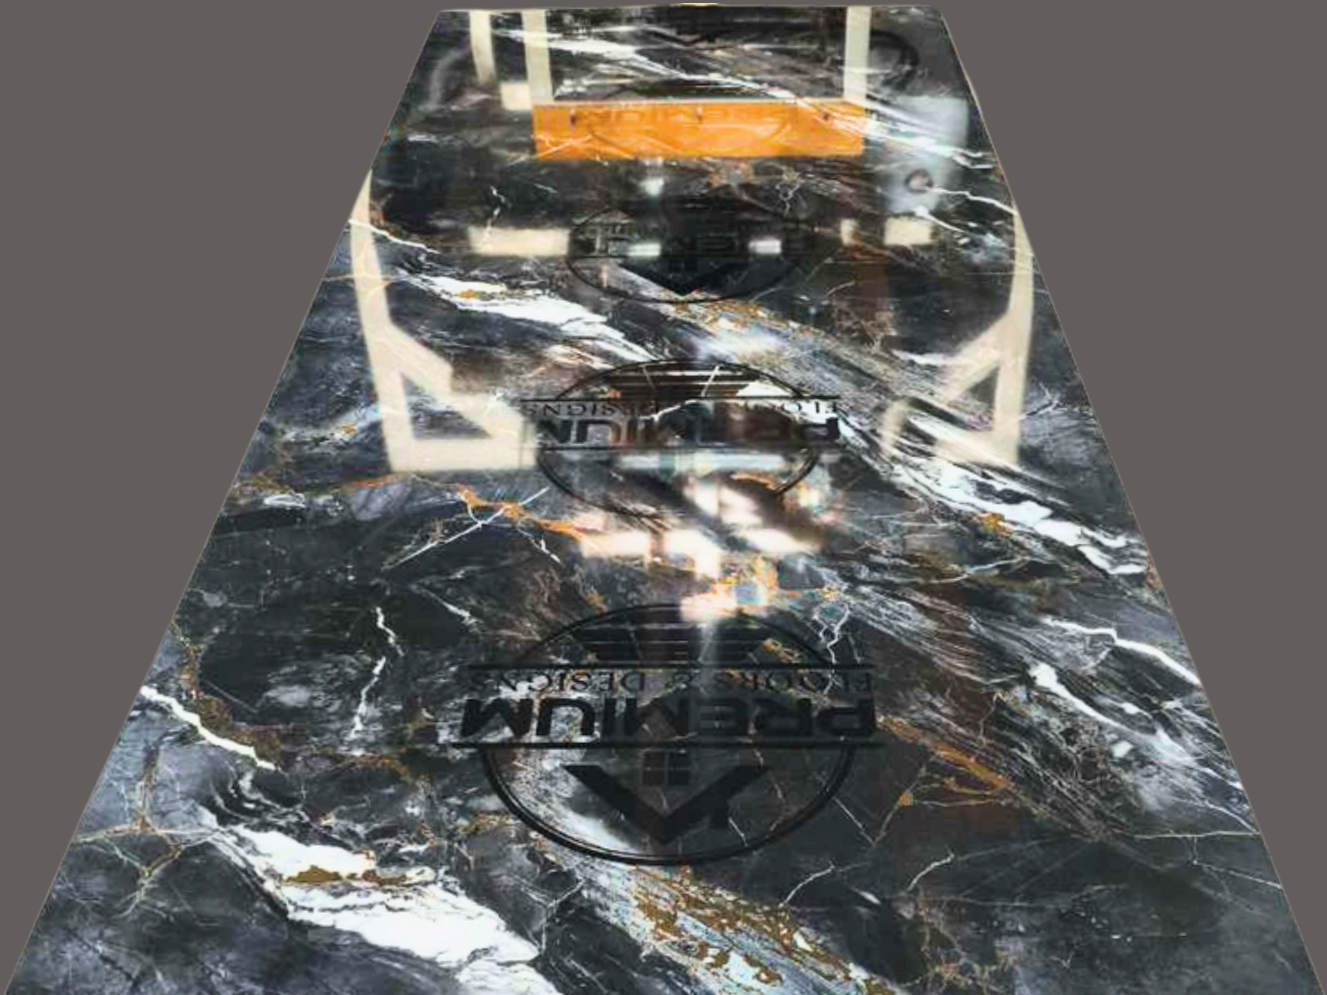

An elegant white and gray marble pattern with cool blue-gray undertones and soft, natural veining. It evokes the refined look of European marble blended with a modern icy tone, making it ideal for bathroom walls, feature panels, and high-end interior spaces seeking a fresh, luxurious aesthetic.

Titanium Noir

A deep charcoal black marble with bold golden and silver veins running across the surface. The rich dark tone gives a dramatic, high-end look, perfect for modern feature walls, upscale bars, and luxury bathrooms. It captures the essence of natural stone elegance while keeping the lightweight, easy-to-install benefits of PVC marble.

Obsidian Gold

A luxurious black marble design with bold white and golden veining running throughout the surface. The deep black base adds drama and sophistication, while the gold highlights bring warmth and elegance.

Calacatta Imperial

A timeless white marble design featuring delicate gray veins interlaced with golden highlights, creating a refined yet luxurious appearance. Calacatta Imperial brings brightness and sophistication to any interior.

Modified Inorganic Composite / Flexible PVC Wall Panel

Composition:

Calcium carbonate + polymer resin + fiber reinforcement.

Thickness: 2.5mm

Size: 24x48 inches

Finish: Matte textured surface resembling stucco, plaster, or travertine

Backside: Typically has a smooth or mesh layer for easy adhesive bonding.

Characteristics:

- Lightweight and flexible
- Fire-resistant and waterproof
- Weather-resistant, suitable for indoor and outdoor use
- Easy to cut and install with adhesive or staples
- Commonly used for accent walls, ceilings, façades, and decorative columns.

Classic Travertine

A timeless travertine-style panel in warm beige and ivory hues. Its natural linear flow brings a sense of luxury and sophistication to any wall application.

Silver Travertine

Inspired by natural travertine stone, this design features gentle silver-gray tones with subtle linear veining, creating a calm and contemporary wall finish.

Cream Fossil

A soft limestone-inspired texture with a natural, weathered look. The light cream background with fine fossil-like details adds depth and warmth to interiors.

Sandstone Beige

A soft matte surface resembling natural plaster or sandstone, perfect for minimalist or Mediterranean-inspired designs. Smooth yet tactile, ideal for both walls and ceilings.
